Project Assignment 2 | Planning Analysis Sheet

Name: Gabriel Gutierrez
Student ID: 1228313998
Date: 9/9/2026

Instructions: Answer the following questions using complete sentences. You should use these questions to have a written discussion about the website you are going to design for the topic you submitted for Project Submission 1.

1. Website Goal (10 points)

My website will explain what Buhurt is, how to get into it, and various other aspects of the sport. It will achieve this by using photos, videos, manuscripts, and links to different stores or sites that are in the same field.

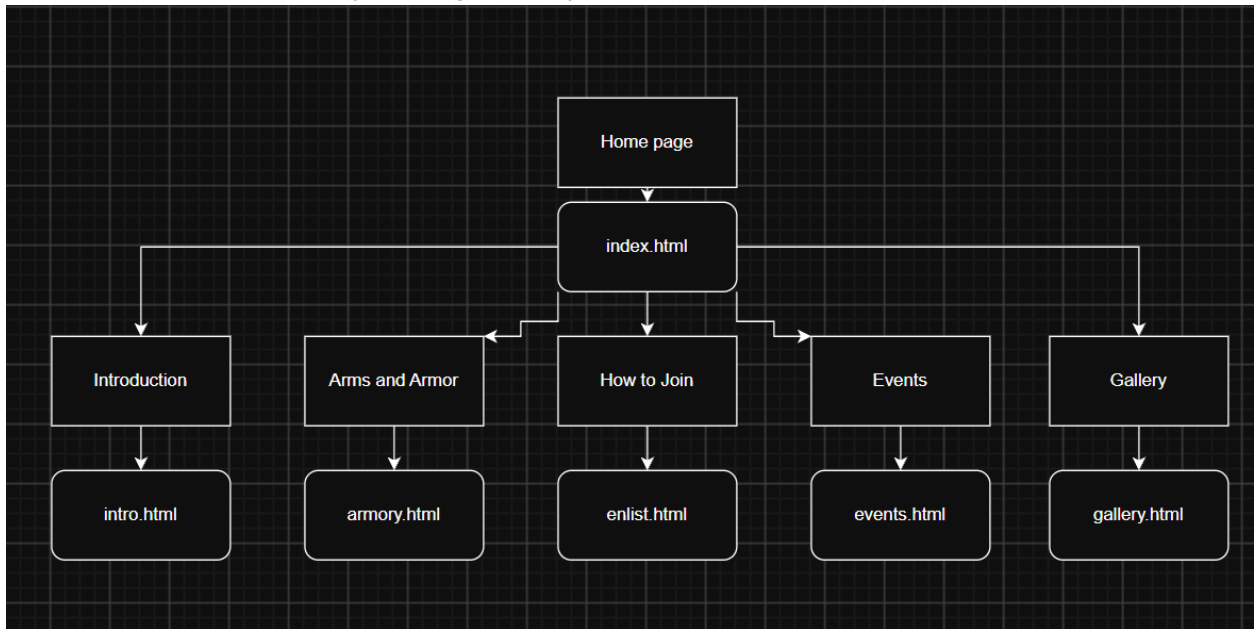

2. What results do I want to see? (20 points)

- *index*
Plays a video or shows an image of a high intensity buhurt fight to hook a visitor in to learn more.
- *Introduction*
Introduce the visitor to the sport and give a brief explanation and describe its history.
- *Arms and Armor*
Showcase the various types of armor and weapons allowed in the sport with images from real life and manuscripts.
- *How to Join*
Explain how people can join and where to go to sign up and join a team. This will also touch on ways they can get started before getting armor.
- *Events*
Introduce and explain the different kinds of events that Buhurt takes place in, where their local one might be, and where to go to see the sport if the visitor just wants to watch.
- *Gallery*
Showcase some videos and images of Buhurt for a curious visitor to see the cool factor.

3. Insert a sitemap below. (10 points) *Most websites follow a hierarchical organization where the landing page is the Home page (the index.html file). This means the Home page opens when visitors enter your website's URL. Use a computer application (word process, PowerPoint, draw.io, etc.) to draw a sitemap of your website that shows the hierarchy of pages and relationship between the pages. If you are using a computer application to create a site map and save as a .gif or .jpg file (within the application or using Print Screen) and insert them, with Insert ☐ screenshot function, below.*

Project Assignment 2 | Planning Analysis Sheet

4. What information do I need? (20 points)

List where you will obtain the content (facts, text, graphics, sound, video, etc.) for the web pages you listed above. If the information is from a website, list its url. Can't just answered will google it. (10 points)

List out this information separately for each page you listed in Question 2. (10 points)

- <https://www.youtube.com/@timothyhines6220>
My personal favorite videographer of Buhurt content. His high quality recordings will be the basis of most of the videos I share on this site.
- <https://www.buhurttech.com>
A great site for both arms and armor. Also gives a solid about section.
- <https://medievaextreme.com>
Another great site for purchasing armor and weapons. Will use this as well for a lot of the images of gear.
- <https://www.medievalcombat-usa.com/club-locator>
Will help new people find their local group and find what events they might be going to.
- <https://www.buhurtinternational.com/rules>
Explains the rules and authenticity behind the sport and what a fighter needs to do to be a part of it properly. This also has many images from manuscripts in it to use.

Project Assignment 2 | Planning Analysis Sheet

5. What color scheme will you use for your site? (20 points)

Go to <https://www.realtimecolors.com/> and select a color scheme you like. Play around with the different types of color combinations. When you find one that you like, click the Export button (the third button from the right).

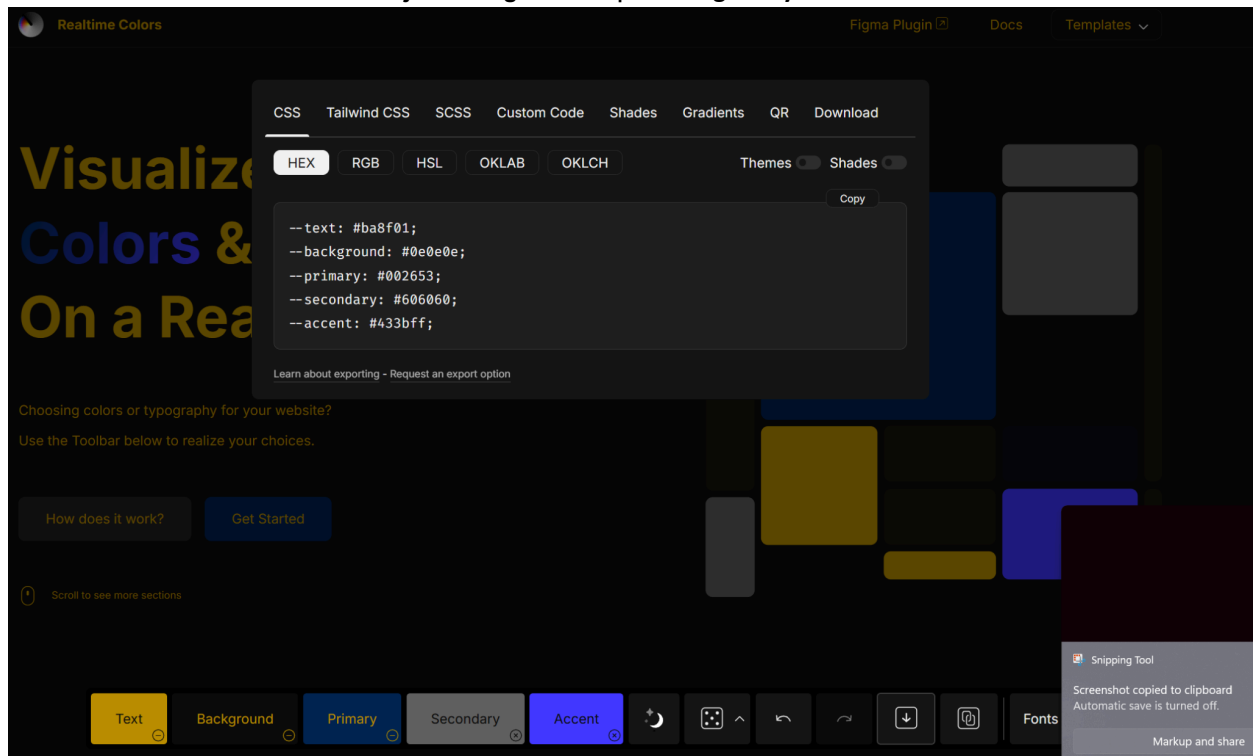

Include those CSS styles in your project assignment's CSS file as global variables inside the :root selector. For reference, please refer to the example at https://www.w3schools.com/css/css3_variables.asp.

Take a screenshot of the entire screen and paste it in the space below. Below is an example. The color scheme showed in the bottom of the screenshot is worth 10 points, and the CSS style code, in the center of the screenshot, is also worth 10 points. Please submit a screenshot that includes both the color scheme and the CSS styles.

Project Assignment 2 | Planning Analysis Sheet

```
--text: #ba8f01;
--background: #0e0e0e;
--primary: #002653;
--secondary: #606060;
--accent: #433bff;
```

6. How will your project use a form? (20 points)

- I will add a form to collect input on what interests the visitor and how they found the site. I would like to collect their thoughts and also find if they were inspired enough to join or visit an event to check it out.
- I want to collect their email, feedback, interest in attending an event, and whether or not they actually did and if so where.
- Email allows me to contact them, feedback will allow me to add or remove things from the site, interest in future events will help me see if the site is working and people are garnering an interest, and lastly if they actually attend an event I would love to hear how they liked it.
