Project Assignment | Project Update #1

Name: Gabriel Gutierrez
Student ID: 1228313998
Date: 9/25/2026

Instructions: You should have one page (1 html file and 1 css file) of your site completed by the time you submit this. Use the following to have a written discussion about the current progress of your website. After answering the questions below, insert a screenshot of the index.html file's browser view that you have completed so far (remember, you should have one page's browser view and a CSS file). Do NOT screenshot the HTML code, as we can't run the code. Save the file to yourasurite – Project Assignment – Project Update 1.docx file and yourasurite – Project Assignment – Project Update 1.pdf file. Submit both files to Canvas.

1. How do you feel your website is coming along? (10 points)

I am happy with how my site is coming along. The main index page colors come together well and I have found a good amount of images for it that capture the vibe I am looking for. Nothing looks out of place and when I have the hyperlinks leading to their respective areas I think it will be even smoother of an experience.

2. What issues have you encountered on your first page? (4 points) How did you fix those issues, if you did? (3 points) Are there any issues still unresolved? (3 points)

An issue I encountered was not being too familiar with adding videos to my html. Since it is late I intend to experiment with it more next time and for now have substituted it with the thumbnail of the image with a link when clicked. In time I want to replace this with a proper embedded video.

3. Tables are useful when you need to display data in an organized and structured format, such as schedules, pricing lists, or comparison charts. They help improve readability and allow users to quickly interpret information. Describe in which page you would like to use a table on your website (4 point) and what info will be included in that table (6 points). Please note: A table needs to have at least a header row + at least three data rows + at least three columns.

I will probably use a table in the introduction page. I want to separate info regarding the differences between Buhurt, Hema, and Harnesfechten and how they relate. This will include the differences in their history, practice, and equipment. Using a comparison chart here will help visitors learn about these sports and which might fit them.

Project Assignment | Project Update #1

4. Where would you like to use a form on your website? (2 points) What will the form be used for? (2 points) Draw a simple sketch of how it will look (what fields will be included, any basic styling, etc.) and paste it below: (6 points) Please note: A form should have at least 4 fields.

The contact form will use a form for questions to be sent and reviews to be collected. It will include basic return contact info as well as their message.

First name: _____

Return email: _____

What is your question?: _____

How do you feel about this site and its content? _____

Did this website interest you in attending a Buhurt event? _____

5. List your project website's GitHub URL. (10 points)

<https://github.com/Charmo-1/Charmo-1.github.io>

6. After doing several pages, has your sitemap changed? If so, revise your previous sitemap and insert it below: (10 points).

My sitemap has not changed and remains the same as before. When I make the pages for the links to lead to they will be in the same order as before explored by the users interests with a variety of pages.

7. Insert the latest wireframe below: (10 points)
